Money From Past To Sharing Economy: *Studying OneGram as Future Prototype*

Dr Kaleem ALAM

Money being the greatest financial evolutionary invention by human being; has been true to its progression. It appears to have reached a stage where the money seems to be transiting to a new paradigm. The increasing debate on nature of future currency is already taking place. This paper explores important stages of money's evolution including the Islamic coinage and understanding of money. It will try to study OneGram as possible model of cryptocurrency for the future sovereign cryptocurrencies.
